Dr. Rongxiang Xu Receives the Prestigious Scroll Award from Los Angeles County Government

LOS ANGELES, Oct. 31, 2013 /PRNewswire/ -- Dr. Rongxiang Xu, a Los Angeles resident, received the prestigious Scroll Award from the Los Angeles county government on October 29, 2013 in the Kenneth Hahn Hall of Administration, for receiving the International Golden Biatic Award 2013 for his invention of organ regeneration science. The Scroll Award was also given to Kevin Xu, Dr. Xu's son who is a California State Government Advisor, Young Entrepreneur Council member, CEO, and also supports and collaborates with Dr. Xu on his scientific research and developments.

The awards were presented by Supervisor Michael D. Antonovich, Los Angeles County Fifth District. Mr. Antonovich provided opening remarks stating "Today, we welcome Dr. Rongxiang Xu, recipient of the Golden Biatic award for his scientific work in the regeneration of human tissue (**organ**). Here today with Dr. Xu is his son Kevin Xu." He further commented that Dr. Xu is a renowned trauma burn surgeon and scientist who revolutionized the way doctors treat burn victims and replaced skin grafting with his inventive burns regenerative therapy; prior to the development of burns regenerative therapy, patients would have to endure painful skin graft surgery which resulted in lifelong scarring. By applying burns regenerative therapy, patients with deep degree burns can heal with little to no scarring by in situ skin regeneration, thereby avoiding the torture of skin graft. The route and solution of organ regeneration science invented by Dr. Xu has led the scientific community to believe that human tissues and organs could achieve in situ regeneration.

The European IEF Economic Club awarded Dr. Xu as the only foreign laureate of the International Golden Biatic 2013 for his invention of organ regeneration science and its route and solution. The Golden Biatic international award is a prestigious honor for international personalities who have made great contributions to mankind. In the past, the Award has been given to 28 leaders of nations and world economy including Russian President Vladimir Putin, former U.S. President George W. Bush, and former President of France Jacques Chirac. Dr. Xu is the 29th international laureate of Golden Biatic. Rongxiang Xu delivered recently a landmark presentation during his awarding ceremony of Golden Biatic to declare that mankind is entering the era of applied organ regeneration science.
